2016 Pre-Order Fruit Tree Form (Low Chill List)

Dave Wilson Nursery is partnering with H & H to bring you a wider selection of Fruit Trees for the 2016 season.

In addition to our regular fruit tree order, Dave Wilson's is allowing our customers to select their own Fruit trees from their wish list.

Normally, we have to select 10 trees of a single variety, but with this program, they are allowing us to purchase one of a particular variety!

Final cut-off date for this Special program is November 6, 2015.

Once the orders have arrived at the nursery, they will be canned up in nursery containers, and ready for pick-up.

We will call you to let you know they are ready for pick-up. They should be available in Mid February 2016.

Prices Effective: July 6, 2015 to November 6, 2015. Payment must be made in full.

20% Discount will be given at register

(*)= Dave Wilson Patent/Patent

Numbers in parenthesis are estimated chill hours per Dave Wilson's Nursery

Rootstalk Information

Chilling Hours: Refers to the number of hours, 45°F and under, during the dormancy period. These hours need not be continuous. All fruit and nut trees need a specific amount of chilling hours before they will produce fruit

Root Stalks: Almost all fruit trees can be kept pruned under 8 feet tall with summer pruning. Fruit in parenthesis are available on those rootstocks

Apple Seedling: (Apples)

Rugged root stock for apples. Vigorous, and tolerates wet, dry, and poor soils. 18-30 feet unpruned height.

Bud-9: (Apples)

Dwarfing to 1/3 of standard. Approx. height to 10 ft. high, by 6 ft. wide. Resistant to phytophthora. Produces large fruit. Good choice for heavy soils

Geneva 935

Developed by Cornell University. Approximate height to 8-10 feet. Cold hardy, fire blight resistant. Resists crown rot and root rot

M-27: (Apples)

Extremely dwarfing rootstalk for apples. 6-8 ft. tall. Ideal for container growing and small spaces. Requires constant moisture. Young trees need staking

M-7: (Apples)

Unpruned tree height is 2/3 of standard, or 12-20 feet tall. Resistant to fire blight and powdery mildew

M-111: (Apples)

Excellent all around rootstock for apples. Induces bearing at a young age. Tolerates wet, dry and poor soil conditions. Resists wooly apple aphid: and collar rot. 15-25 feet tall, if unpruned.

Mahaleb: (Cherry)

Induces bearing at young age. Resists crown gall, bacterial canker, and some nematodes. 25-35 ft. if not pruned. Does not tolerate wet soils

Colt: (Cherry)

For sweet cherries. Grows 22-30 ft. if unpruned. Relatively tolerant of wet soils, but good drainage is still required. Shows resistance to bacterial canker

Mazzard: (Cherry)

Vigorous rootstock, and more tolerant of wet soils vs. Mahaleb. Good drainage is necessary. Resistant to root-knot nematodes. 30-40 ft. if unpruned

Zaiger Dwarf Cherry: (Cherry)

Tested as 3CR178. Dwarf cherry trees may be kept to 8-12 ft. unpruned. Ideal for container growing. Promotes early bearing.

Marianna 26-24: (Apricots, Plums, and Almonds)

Shallow root system, tolerant of wet soils. Resists root-knot nematodes and oak-root fungus. Mature unpruned tree height is 15-20 feet tall

Citation: (Apricot, Aprium, NectaPlum, Nectarine, Peach, Peacotum, Plum, Pluot)

Very tolerant of wet soils. Resists root-knot nematodes. Induces heavy bearing at a young age. Will keep peaches and nectarines dwarfed to 8-14 ft. tall and apricots and plums to 12-18 feet tall, if left unpruned.

Myrobalan 29C (Myro 29C): (Plum, Pluot)

Shallow, but vigorous root system. Tolerates wet soils. Immune to root-knot nematodes, shows some resistance to oak-root fungus. 15-25 ft. if unpruned

St. Julian: (Apricots, Peach, Plum)

Semi-dwarf rootstock for cold hardy areas. Preferred over Citation in Pacific Northwest.

Lovell: (Apricot, Nectarine, Peach, Plum, Plum-Cot, and Almond)

Vigorous rootstock, and more tolerant of wet soils vs. Nemaguard. Susceptible to nematodes in sandy soils. 15-25 ft. unpruned height

Nemaguard: (Apricot, Aprium, Nectarine, Peach, Plum, and Almond)

Very resistant to root-knot nematode. Needs well-drained soils. In heavy soils, needs to be planted in raised planter bed or mound. 15-25 ft. if unpruned

Pear Seedling: (European Pear)

Vigorous, and tolerant of wet soils. Resistant to oak-root fungus. 15-25 ft. unpruned height.

OHxF333: (European and Asian Pear)

Disease resistant rootstock. 12-18 ft. unpruned height.

Betulaefolia: (Asian Pear)

Tolerant of wet, dry, and alkaline soil. More vigorous than Calleryana. 15-25 ft. unpruned height

D. Lotus: (Persimmons)

12-25 ft. unpruned height.
