Classifications:

HT - Hybrid tea. This is the largest and most popular group of roses. The rose flowers are usually well-formed, with large, high-centered buds, supported by long, straight and upright stems. They are very popular as cut flowers.

GR - Grandiflora. This is a cross between hybrid tea and floribunda roses. They tend to carry their flowers in clusters on top of tall stems. The flower size is a bit larger than floribunda.

FL - Floribunda. These types of roses are usually smaller, and more compact with large flowers in open clusters. They were developed from crosses of Hybrid teas and polyantha type roses.

SHR - Shrub. These are more hardy, easy-care roses that are well suited for ground cover, hedge row or for screening.

Miniature - Smaller roses that are perfect for balconies or patios or smaller garden spaces. They are usually a compact, prolific bloomer that can have small, classically shaped rose flowers.

Climber - Climbing roses do best when properly trained and tied, to grow up fences, over wall, and through pergolas, or on trellises. The length of the canes range from 6 to 12 feet, depending on the variety.
